

NO DIG Equipment

The Trenchless Technology Specialists

VM500

Vacuum excavator with 500L inclined spoil tank

Triple cyclonic filtration system

Minimises filter cleaning with 3 stages cyclone separator & 5-micron poly filter.

Tip : Sucking wet spoil helps to keep the filter dust free and considerably increasing its life.

Powerful positive displacement blower

550cfm at maximum engine revs with 15Hg of negative pressure. High level continuous vacuum, without the need to prime or keep the inlet hose submerged. Ideal for mud removal from roads or grass.

Easy dumping

Quick easy emptying for all Vacuum Machine.

Tip : Leave the vacuum on, undo the locking handle, then turn the vacuum off. The door will open automatically.

High pressure water system

Set at 3000psi, it will enable you to quickly and safely pothole to determine the exact location of utilities or bore head using the long nose high pressure gun.

Specifications

The VM500 comes with the following features :

- 3" dia. suction hose all round and 550 CFM @15Hg Vacuum Pump (roots type blower)
